Instructions for the VPN-OUT UNITN service

The VPN-OUT service allow you to access the Unitn intranet from remote locations and to access internet resources using a public UniTN ip address.

- **WARNING**: Students can connect to VPN-OUT only from external networks, not from Unitn networks.

To use the VPN-OUT service you have to follow the general VPN instructions Configurazione VPN di Ateneo but, when required, you have to use the connection URL:

https://vpn-out.icts.unitn.it

instead of

https://vpn.icts.unitn.it

**VPN-OUT properties**

**traffic flow**

All the traffic will flow in the SSL tunnel and the internet traffic is NATTED with a UniTN public ip address.
