Instructions for the VPN-OUT UNITN service

The VPN-OUT service allow you to access the Unitn intranet from remote locations and to access internet resources using a public UniTN ip address.

- **WARNING**: Students can connect to VPN-OUT only from external networks, not from Unitn networks.

To use the VPN-OUT service you have to follow the general VPN instructions Configurazione VPN di Ateneo but, when required, you have to use the connection URL:

```
https://vpn-ssl.unitn.it/vpn-out
```

instead of

```
https://vpn-ssl.unitn.it
```

VPN-OUT properties

assigned IP address

ip range: 10.31.111.10 a 10.31.111.254

traffic flow

All the traffic will flow in the SSL tunnel and the internet traffic is NATTED with a UniTN public ip address.

User Firewall Requirements

TCP 443. For ESP mode UDP 4500.
