Calendario

Vanno prima installati i plugins **Lightning** e **Provider for Google Calendar** da Tools → Add-ons poi si procede ad aggiungere un calendario.

- impostare un calendario: File → new → calendar

The screenshot shows a dialog box titled "Create a new calendar" with the subtitle "Locate your calendar". The main text reads: "Your calendar can be stored on your computer or be stored on a server in order to access it remotely or share it with your friends or co-workers." There are two radio button options: "On My Computer" and "On the Network". The "On the Network" option is selected and highlighted with an orange border. At the bottom right, there are two buttons: "Cancel" and "Next".

Create a new calendar
Locate your calendar

Your calendar can be stored on your computer or be stored on a server in order to access it remotely or share it with your friends or co-workers.

☐ On My Computer

☒ On the Network

Cancel Next

Create a new calendar
Locate your calendar

Provide info about what is needed to access your remote calendar

Format: ☐ iCalendar (ICS)
☐ CalDAV
☐ Sun Java System Calendar Server (WCAP)
☒ Google Calendar
☐ Microsoft Exchange 2007/2010/2013

Please advance to the next step to set up your calendars.

- selezionare l'utente e i calendari che volete avere in Thunderbird.
