

# 802.1x Configuration

[versione italiana](#)

To access unitn wired network, your device must be properly configured and you have to use your valid unitn credentials.

Below some step-by-step howto for various **Operating Systems**:

- [Windows XP](#) (almost Service Pack 3 )
- [Windows Vista](#) (almost Service Pack 2)
- [Windows 7](#)
- [Windows 8](#)
- Mac OSX: see the instruction [step to step](#) or watch [video](#) - click [here](#) for download the certificate necessary to configuration it
- [Mac Lion](#)
- [Linux Fedora 19](#)
- [Linux Ubuntu 10.04/12.04 LTS](#)
- [Linux Ubuntu 13.04 LTS](#)
- [Generic Linux \(command line for skilled user\)](#)

## Browser configuration

The navigation of this network is in NAT mode (no proxy), for different browsers proxy configuration will be set in "auto-detect", namely:

- Firefox: Options → Advanced → Network → Settings... "Auto-detect proxy settings for this network"
- Explorer:
- Safari:
- Chrome:
